

What if you found out the life you're living today is not the only one you'll ever experience, but just one of many?

Do our souls return to earth time and time again? Do we come back with a different identity and new lessons to learn in each lifetime as our spirit evolves towards its highest realization? This unique book explores the theory of reincarnation from the perspectives of science, religion, parapsychology, history, and logic in a balanced and respectful way that invites the reader to draw their own conclusions.
